

The background of the image is an abstract, flowing composition of wavy, ribbon-like shapes in various shades of purple and pink. The colors transition from a deep, dark purple on the left to a bright, almost white-pink on the right. The shapes are layered and curved, creating a sense of depth and movement.

# *What is* **V-Light Solution?**

V-Light Solution is an advanced fat dissolving and body contouring treatment designed to safely and effectively reduce unwanted fat.

Utilising a unique blend of predominantly naturally occurring ingredients, including phosphatidylcholine and deoxycholic acid, V-Light Solution breaks down fat cells and improves skin elasticity.

Targeting stubborn fat deposits in areas such as the double chin, cheeks, and abdomen, providing a more defined and contoured appearance without the risks associated with traditional weight loss methods.

With a lower concentration of deoxycholic acid, V-Light Solution is safer for use on sensitive areas like the face. Promoting collagen synthesis, strengthening blood vessel walls, and restoring the skin's natural elasticity and appearance.

Clinical studies have demonstrated its efficacy and safety, making V-Light Solution a leading choice in aesthetic treatments.

## ABOUT US

# Why Was V-Light Solution Developed?

V-Light Solution was developed to offer a safer, more effective alternative for fat dissolution and body contouring. Recognizing the limitations and risks associated with existing treatments, our team of experts sought to create a product that could deliver superior results with a higher concentration of organic ingredients and lower risks, particularly for sensitive areas like the face.

# 1.0

ABOUT US

## Market Presence and Impact of V-Light

V-Light Solution has been in the market in the UAE for several years, during which it has garnered a strong reputation for its effectiveness and safety. Our ongoing commitment to research and development ensures that V-Light remains at the forefront of fat dissolution technology.

## Clinical Evidence Supporting V-Light Solution

Several clinical studies have been conducted on V-Light Solution, with findings published in reputable medical journals. These studies have consistently demonstrated the product's efficacy and safety, highlighting its advantages over other fat dissolvers on the market.

## PRODUCT INFORMATION

# The Unique Formulation of V-Light Solution

V-Light Solution is composed of a unique blend of organic and highly effective ingredients. The key components include phosphatidylcholine and deoxycholic acid, among others. Each ingredient has been carefully selected for its ability to contribute to the breakdown and elimination of fat cells.

## Concentrations of Key Ingredients in V-Light

- Phosphatidylcholine: 2%
- Deoxycholic Acid: 0.5%
- Other organic compounds: 97.5%

## Deoxycholic Acid

Deoxycholic acid is a commonly used solution for injection lipolysis. When injected, it disrupts the cell walls of adipocytes, leading to inflammatory necrosis and a reduction in fat cell size.

## Juglans Regia (Chinese Walnut)

Juglans Regia (Chinese Walnut) increases blood flow to the skin, aiding in follicular cleansing and the elimination of toxins. This effect is due to its high concentration of linolenic acid, arginine, and vitamin E.

## Fucus Vesiculosus (Bladder Wrack)

Fucus Vesiculosus (Bladder Wrack) extract contributes to rejuvenating and slimming the legs by effectively reducing cellulite.

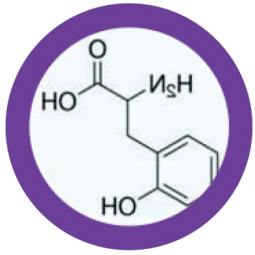

## Aesculus Hippocastanum (Chestnut)

Aesculus Hippocastanum (Chestnut) improves capillary function, strengthens venous blood vessel walls, and enhances blood flow. It alleviates peripheral blood flow congestion and various circulation disorders by stimulating blood circulation and increasing perfusion in peripheral blood vessels.

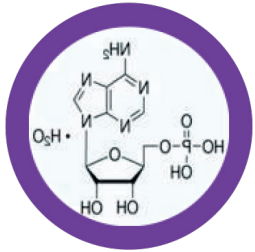

# 2.1

## Tyrosine

Tyrosine plays a crucial role in the biosynthesis of dopamine and epinephrine, and it also supports lipid metabolism, aiding in the burning of body fats.

## Disodium Adenosine phosphate (ADP)

Disodium Adenosine phosphate (ADP) acts as a high-energy phosphate binder, enhancing muscle activity and promoting cellular function by serving as an energy source for cells.

## Pulsatilla Extract

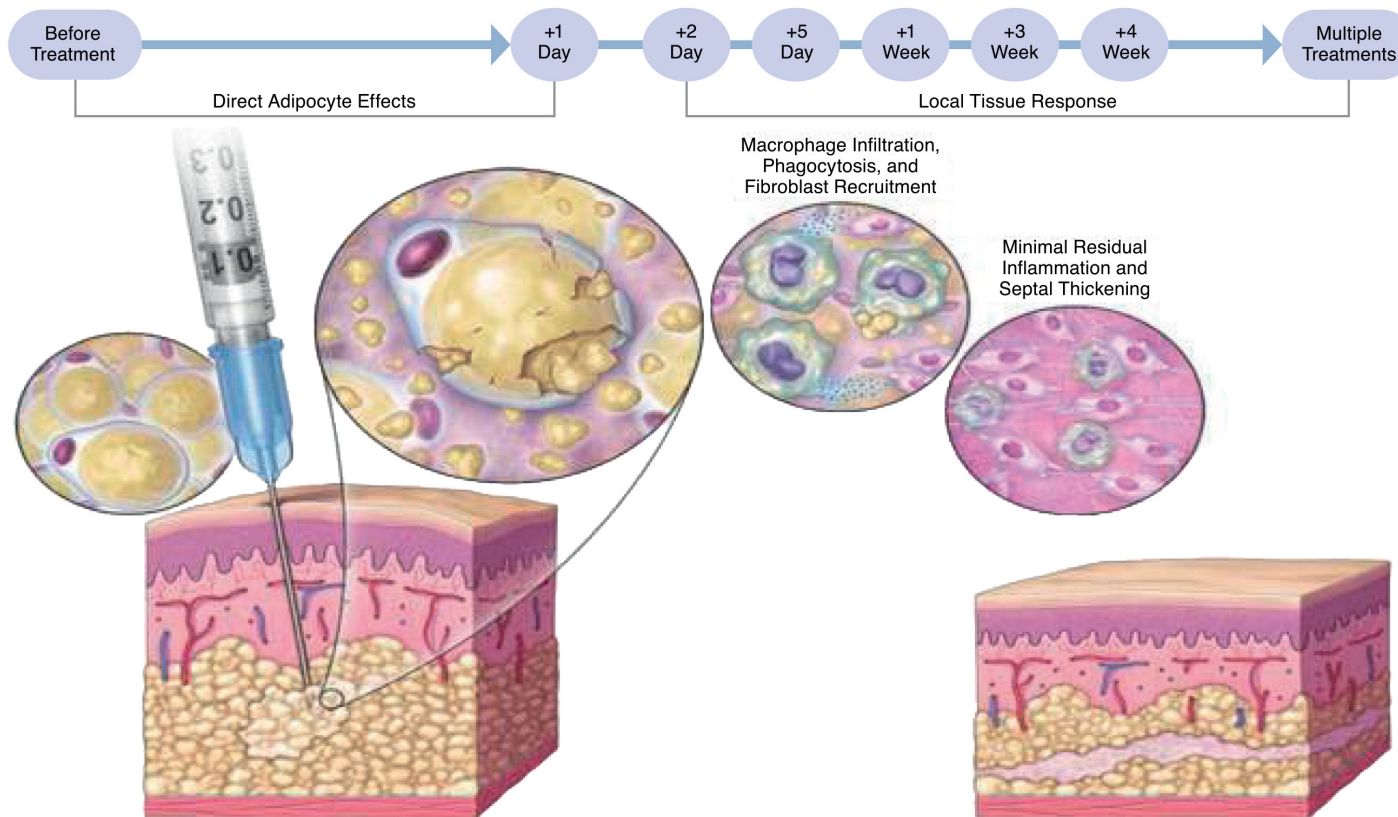

Pulsatilla Extract contributes to cleaner and more elastic skin through its clinically proven effects, derived from the rich saponin content naturally found in Pulsatilla roots.

## Sodium Chloride

Sodium Chloride serves as a cationic element in extracellular fluid, promoting vasodilation, increased blood flow, angiogenesis, and enhanced myocardial metabolism.

# 2.3

## Mechanism of Action: A Detailed Breakdown

V-Light Solution leverages the power of phosphatidylcholine, a phospholipid derived from soybean lecithin, to effectively break down fat. This ingredient penetrates the fat cell's double lipid layer, acting as an emulsifying agent that makes the fat easier to eliminate.

Additionally, deoxycholic acid in the formulation disrupts the fat cell membranes, releasing their contents to be metabolized by the liver. The synergistic action of these ingredients ensures a thorough and efficient reduction of fat deposits, resulting in a slimmer and more contoured appearance.

## Why Choose V-Light Over Lemonbottle and Aqualyx?

V-Light Solution stands out due to its superior formulation, which enhances its overall effectiveness while minimizing the risk of adverse reactions.

Unlike other products, V-Light Solution strikes an optimal balance with its deoxycholic acid concentration, making it both highly effective and gentle enough for use on sensitive areas, such as the face. This precise formulation ensures better results with greater comfort and safety, making V-Light Solution the preferred choice for those seeking advanced fat dissolution and body contouring treatments.

# 2.4

# The Unique Benefits of V-Light Solution

## **NATURAL INGREDIENTS**

Predominantly natural formulation ensures a treatment that is safer and more natural, minimizing adverse reactions often associated with pure synthetic compounds.

## **LOWER CONCENTRATIONS OF DEOXYCHOLIC ACID**

By maintaining lower concentration of deoxycholic acid, V-Light Solution is designed to be safer for facial use, reducing the risk of side effects and discomfort commonly experienced with higher concentrations.

## **PROMOTES COLLAGEN**

V-Light Solution boosts collagen production, enhancing skin elasticity and rejuvenating appearance naturally..

## **EFFECTIVE FOR DOUBLE CHIN**

Effectively targets and reduces stubborn double chin fat, which is often resistant to traditional weight loss methods, providing a solution that enhances facial contours and definition.

# Treatment Specifications

<b>DURATION</b>	Each session of V-Light Solution treatment takes approximately 30 minutes.
<b>NEEDLE</b>	A 30/32 gauge 14mm needle is recommended for the injections.
<b>INJECTION DEPTH</b>	Injections should be administered into the fat tissue, between 6 mm -13 mm for maximum efficacy.
<b>MAX CC FACIAL AREAS</b>	Facial applications should not exceed 4ml.
<b>MAX CC BODY AREAS</b>	For body areas, the maximum amount that can be used is 10ml.
<b>MAX CC INJECTION POINT</b>	Each injection point should not exceed 0.2cc. Areas with less fat, a maximum of 0.1cc should be used to ensure precision and safety.
